

i-Mediator

A Revenue Maximizing Solution for Next Gen Service Providers

PRODUCT

i-Mediator is a data collection tool that integrates with any type of network element for the capture of CDRs/Transaction details. It allows the defining of business rules that are applied on CDRs, while converting them into a billable format. i-Mediator can capture data from multiple sources and feed it into multiple downstream applications such as billing, data warehousing, fraud management and network management.

FOCUS

i-Mediator is meant for providers of Next Gen services, wireless, wireline, IP services and content providers.

FEATURES

i-Mediator provides telcos the ability to:

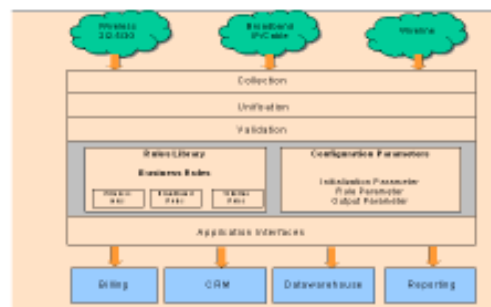

- ▶ aggregate events from multiple service points (voice, data or IP)
- ▶ correlate, validate and process events through a library of Rules
- ▶ deliver qualified events to downstream functions such as billing, CRM, data warehousing, reporting and fraud
- ▶ provide integrated triple play for voice, video and data services

BENEFITS

With i-Mediator, telecom service providers enjoy the following benefits:

- ▶ access to a platform-agnostic product that supports any type of network traffic—voice, data or IP—on a single platform
- ▶ the ability to identify unrecognizable event records and reprocess them

i-Mediator Architecture

i-Mediator

BENEFITS (continued)

- ▶ enhanced accuracy owing to the elimination of duplicate or unbillable event records
- ▶ the ability to pay-as-they-use, thereby reducing TCO
- ▶ rapid integration with multiple upstream and downstream elements and scaling and managing large volumes of data quickly
- ▶ extension of the life of the existing OSS/BSS by adding incremental functionality to manage multiple services
- ▶ productivity enhancement by co-relating rate plan attributes with relevant customer information
- ▶ maximization of service revenues for telcos

INFOZECH SOFTWARE

Infozech Software specializes in providing convergent Billing, Mediation and Rating solutions for packet-based converged network environments. Headquartered in India, with a subsidiary in the USA, the company has 36 global deployments across five continents

Besides expertise in the billing and settlement products space, Infozech is also offering specialized consulting and IT services solutions encompassing areas such as project management and implementation, custom software development, product support and maintenance, software testing, product engineering and outsourced product development.
