

Infozech ports iRater to IBM DB2 & Linux on System p™ using IBM Innovation Center for business partners

Infozech Systems, a leading provider of Telecom Billing is headquartered in India, with a subsidiary in the USA. The company has more than 40+ global deployments across five continents.

Infozech's software specializes in providing convergent Billing, Mediation and Rating solutions for packet-based converged network environments. The company enables emerging and established IXCs, IP carriers, broadband and e-business service providers to enhance their global competitiveness, increase efficiencies, interface better with customers, achieve bottom line improvements and realize their business objectives.

i-Rater, from Infozech, provides a comprehensive rating for wireline (local, long distance and international long distance), wireless (GSM, 2.5G, 3G and Wi-Fi) and IP (DSL, cable, IP-VPN and VoIP) services. It enables higher margin revenue streams by making it easier to introduce innovative and desirable services to the market quickly. It can take as input, any type of event/transaction and its charging parameters (in the form of rate plans/charge plans), process them and finally, produce the record of the processed event as output. i-Rater can rate events either in a pre-paid or post paid scenario and can be used as a credit monitoring application for post-paid customers

Infozech worked with the **IBM Innovation Centre (IIC)** in Bangalore to port the iRater from MSSQL to IBM DB2 . iRater stood the test of being a scalable option; by conducting performance test on IBM System p™ hardware using IBM DB2® software. The engagement resulted in extremely good test results, giving Infozech the capability to enhance the delivery of their solution on IBM platforms.

Ankur Lal - CEO of Infozech Software said, "Teaming with IBM was a success on many levels. We were impressed by the commitment demonstrated by IBM, during the entire process of testing and benchmarking. They extended timely assistance, coupled with domain expertise, and thereby, making the whole exercise a memorable experience."
